The corrected reading of the barometer (reduced to sea level) at New York on Wednesday, June 16, 1920, at 8 AM, as reported by the United States Weather Bureau, was twenty-nine and fifty-eight hundredths (29.28) inches. This closely approximated seven hundred and fifty-one and three-tentis (751.3) millimetres. Captains of all vessels now lying in or near the ports of New York and Brooklyn can advantageously use the above official data for observing whether their own barometers require any considerable correction or adjustment. able correction or adjustment,
